Research interests

I am a geology Ph.D student with a particular interest in understanding magmatic processes. My aim is to use a multidisciplinary approach, combining petrological data and field observations with fluid dynamical modelling and analogue experiments.

Education

Expected June 2015	M.Sc. Geological Sciences	University of Cambridge
2011-2014	B.Sc. Natural Sciences, First Class	University of Cambridge
2009-2011	Physics (A*) Maths (A*) French (A)	Camden School for Girls
2004-2009	13A*s 1A	Highgate Wood School

Research experience

2014	Master's project supervised by Prof. Andy Woods and Prof. Marie Edmonds looking at the migration of gas through crystal mushes
2014	Sample collection at Stromboli Volcano, Italy
2013	Independent mapping project in Fogo Island, Newfoundland
2010	Laboratory experiments on materials with a negative poisson's ratio with Prof. Katia Bertoldi at the Material Sciences Laboratory in Harvard
2010	Assisting Prof. Mark Lancaster in the Particle Physics group at UCL

Funding, Awards, Presentations

2015	First place in the Neftex Earth Model Award
2015	Martin Jacks Prize from Sidney Sussex College, Cambridge
2015	Harkness Prize from the Earth Sciences Department, Cambridge
2015	Samuel Taylor Scholarship for Natural Sciences by Sidney Sussex College
2015	VMSG meeting, Norwich, UK, Jan 2015: Prize for best poster of my session and best student poster of the conference
2014	Samuel Taylor Scholarship for Natural Sciences by Sidney Sussex College
2014	BPI summer research bursary
2013	College travel grant to visit the ophiolite in Gros Morne National Park, Newfoundland
2013	Research grant for mapping project in Fogo Island, Newfoundland.

Computational skills

2015	Python
2014	MATLAB
2013	ArcGIS, Inkscape

Interests

Climbing, hiking, rowing, music
